Ada Mısırlı

I am a solution-oriented and eager-to-learn developer specializing in software development. My interests encompass web, artificial intelligence, and mobile application development, and I strive to enhance my technical skills through the creation of various projects.

Professional experience

Information Technology and Software Instruction ODD Education Foundation, Izmir/Konak	May 2025 - June 2026
---	----------------------

I volunteer to deliver fundamental computer and IT training, assisting participants in enhancing their digital competencies. I design training programs to refine my capacity to communicate information clearly and effectively. Throughout this process, I enhance my communication, patience, and problem-solving abilities.

Barista MaxBlend Café, Izmir	May 2024
---------------------------------	----------

Throughout my studies, I served as a barista, acquiring valuable experience in customer relations, collaboration, and time management. I adapted to a high-pressure work environment and honed my ability to work efficiently and solution-oriented.

Barista BonAparte Cafe Güzelbahçe	May 2025
--------------------------------------	----------

Throughout my studies, I served as a barista, acquiring valuable experience in customer relations, collaboration, and time management. I adapted to a high-pressure work environment and honed my ability to work efficiently and solution-oriented.

Photography BKM Photography	Sep 2024 - Jan 2025
--------------------------------	---------------------

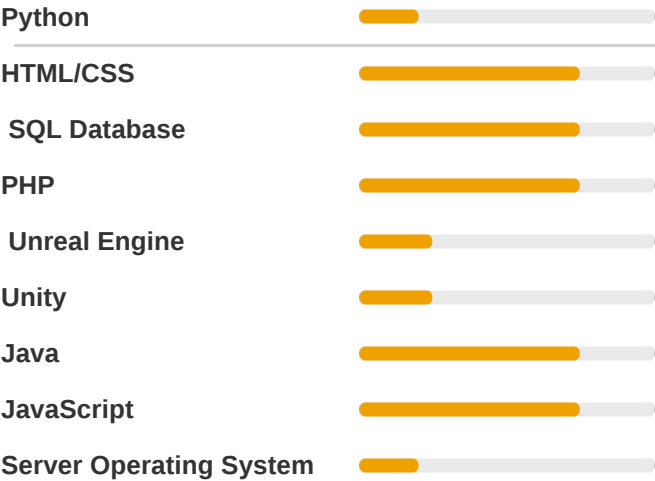

Through active engagement in event and wedding photography, I acquired experience in decision-making, performing under pressure, and delivering customer-centric service. I enhanced my visual composition and team coordination abilities.

Education and Credentials

Computer Programming Izmir University of Economics, Izmir	September 2024 - Present
--	--------------------------

As part of my Computer Programming education, I acquired expertise in programming languages and technologies including Java, SQL, HTML, and CSS. I enhanced my technical skills by undertaking practical projects derived from the courses I completed.

Skills

Courses

	Sep 2018 - Jul 2018
ChatGPT 2025: Prompt Engineering - Content and Visual Creation	Sep 2025 - Cash
<i>Udemy</i>	2025
Crafting prompts to facilitate effective communication and attain precise outcomes with AI tools. I underwent training in the techniques. I acquired practical experience by formulating commands tailored to various scenarios.	
3D Game Development Utilizing Unity	Sep 2026 - Jul 2026
<i>Udemy</i>	
I underwent training in 3D game development utilizing the Unity game engine and the C# programming language. I created applications that emphasized game mechanics, fundamental physics systems, and user interaction.	
Introduction to Machine Learning	Ara 2025 - Ara 2025
<i>Izmir University of Economics</i>	
By acquiring training in the fundamentals of machine learning, data analysis, model development, and foundational algorithms. I acquired knowledge about it. As a component of the school curriculum, I solidified the theoretical understanding through practical applications.	
Gamethon 5.0 Mentorship Certificate	Ara 2026 - Ara 2026
<i>Izmir University of Economics</i>	
Over the course of two days, we guided students through the game development process, assisting them in project development and problem-solving. I offered assistance in problem-solving and technical issues. I enhanced my collaboration and mentoring abilities.	
Anatolian High Schools Inter-School Symposium Competition Participation Certificate	Ara 2022 - Ara 2022
<i>Bursa Technical University</i>	
I undertook comprehensive research on metaverse technologies, developed original content, and delivered it in an academic context. Throughout this endeavor, I effectively employed my research capabilities, analytical reasoning, and presentation skills.
