Ada Mısırlı

I am a solution-oriented and eager-to-learn developer specializing in software development. My interests encompass web, artificial intelligence, and mobile application development, and I strive to enhance my technical skills through the creation of various projects.

Professional experience

ODD Education Foundation, Computer Science Oct 2025-OnGoing
Volunteer Teacher

I volunteer to deliver fundamental computer and IT training, assisting participants in enhancing their digital competencies. I design training programs to refine my capacity to communicate information clearly and effectively. Throughout this process, I enhance my communication, patience, and problem-solving abilities.

Photography Sep 2024 - Jan 2025
BKM Photography

Through active engagement in event and wedding photography, I acquired experience in decision- making, performing under pressure, and delivering customer-centric service. I enhanced my visual composition and team coordination abilities.

Education

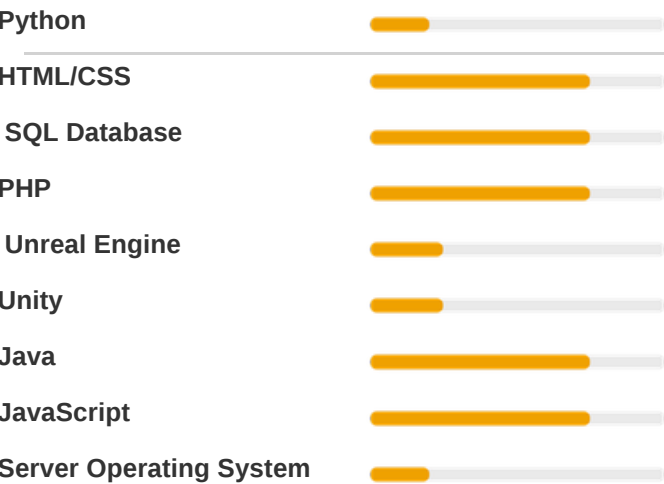

Computer Programming Sep 2024 - OnGoing
Izmir University of Economics, Izmir

As part of my Computer Programming education, I acquired expertise in programming languages and technologies including Java, SQL, HTML, and CSS. I enhanced my technical skills by undertaking practical projects derived from the courses I completed.

Courses

GEN Academy | Online Courses
2026 – Ongoing
I am currently taking courses at GEN Academy in the fields of human resources, marketing, brand management, software technologies, and artificial intelligence. Through these courses, I aim to improve both my digital competencies and professional skills related to the business world.

Skills

Certificates

- ChatGPT 2025: Prompt Engineering - Content and Visual Creation**

Udemy Sep 2025

I received training on techniques for creating prompts to communicate effectively and obtain accurate results using AI tools. I gained practical experience by developing commands suitable for different scenarios.
- 3D Game Development Utilizing Unity**

Udemy Sep2026 - Jul2026

I received training in 3D game development using the Unity game engine and C# language. I developed applications on game mechanics, basic physics systems, and user interaction.
- Introduction to Machine Learning**

Izmir University of Economics Ara 2025 - Ara 2025

I undertook comprehensive research on metaverse technologies, developed original content, and delivered it in an academic context. Throughout this endeavor, I effectively employed my research capabilities, analytical reasoning, and presentation skills.
- Gamethon 5. 0 Mentorship Certificate**

Izmir University of Economics Ara 2026 - Ara 2026

I gained knowledge about data analysis, model building, and basic algorithms by receiving training on machine learning fundamentals. In school, I reinforced this theoretical knowledge with practical applications.
- Anatolian High Schools Inter-School Symposium Competition Participation Certificate**

Bursa Technical University Ara 2022 - Ara 2022

I conducted extensive research on metaverse technologies, created original content, and presented it in an academic setting. During this process, I actively used my research, analytical thinking, and effective presentation skills.
- She-Nergy Webinar Participation Certificate**

Enerjisa Distribution Companies & Youthall May 2026

Participated in the She-Nergy Webinar focused on the energy sector, sustainability, and career development. Gained valuable insights into current practices in the energy industry, sustainability, and professional growth.
